(54) Title: METHOD AND APPARATUS FOR DISPERSION STRENGTHENED BOND COATS FOR THERMAL BARRIER COATINGS

(57) Abstract: A directed vapor deposition (DVD) method and system for applying at least one bond coating (94) on at least one substrate (92) for thermal barrier coating systems (90). The method and system provides for alloy strengthening in high temperature metallic alloys that can be melt or solid state processed to materials that one applies by vapor deposition. The creep strengthened coating (94) contains nanoscopic particles (95) of oxides, nitrides, borides, carbides, and other materials that are formed by reactive deposition. Accordingly, the resultant structure may be utilized for, but not limited thereto, high temperature coatings, e.g. for protecting rocket or power turbines, or diesel engine components. The resultant structure has a greatly extended lifetime attributed in part to the elimination of coating spallation by the "rumpling" mechanism.

The state of Part C	See patent family annex.
Further documents are listed in the continuation of Box C.	"T" later document published after the international filing date or priority
* Special categories of cited documents:	date and not in conflict with the application but cited to understand the
"A" document defining the general state of the art which is not considered to be of particular relevance	principle or theory underlying the invention
"E" earlier application or patent published on or after the international filing date	"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
"L" document which may throw doubts on priority claim(s) or which is cited to	
establish the publication date of another citation or other special reason (as specified)	"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination
"O" document referring to an oral disclosure, use, exhibition or other means	being obvious to a person skilled in the art
"P" document published prior to the international filing date but later than the priority date claimed	"&" document member of the same patent family
Date of the actual completion of the international search	Date of mailing of the international search report 20 JAN 2004
17 November 2003 (17.11.2003)
